Professional Summary

Results-driven WMS Consultant with 2 years of experience specializing in Manhattan Active WMS and AutoStore integration. Proven track record in leading key global projects across the USA and Canada by implementing innovative warehouse solutions and optimizing inventory management processes. Skilled in Python, SQL, MHE configuration, Root Cause Analysis (RCA), and JIRA, known for enhancing operational efficiency and delivering customized solutions.

Work Experience

Mar 2024-Present WMS Consultant

ITORIZON Inc

- Implemented warehousing solutions for customers across multiple global regions. Industries, driving operational improvements.
- Led Proof of Concept (POC) for MHE and AutoStore configuration in Manhattan Active WM.
- Involved in Manhattan Active WM implementation, focusing on configuration, design, and QA..
- Configured and validated AutoStore integration with Manhattan Active WM to optimize inventory management.
- Executed end-to-end configuration and troubleshooting of issues in the Manhattan Active WM application.
- Applied expertise in Rest API testing and debugging extensions to identify root causes and suggest instance solutions.

Nov 2023-Mar 2024 Project Intern

Airport Authority of India, GAGAN Complex

- Completed a technical internship focusing on Python-based web scraping and data quality improvement.
- Automated data collection process.
- Cleaned and transformed scraped data using Excel and Python to ensure data integrity.
- Built dashboards and summary reports to help stakeholders understand data patterns and insights.

Notable Achievements

- Led Proof of Concept (POC) for MHE and AutoStore configuration in Manhattan Active WM to validate integration capabilities.
- Engineered Python scripts for web scraping and data quality improvement, reducing manual data collection effort by 40% and enhancing operational dataset accuracy by 15%.
- Configured and validated AutoStore integration with Manhattan Active WM, optimizing inventory storage and picking efficiency for global retail clients.
- Delivered 24/7 production support for WMS applications, ensuring seamless operation and resolving critical issues through Root Cause Analysis, resolving an average of 4 to 5 critical issues per month.

Education

Degree	Stream	Institute	Year
BE	Electronics and Communication	CMR Institute of Technology	2020 - 2024
BS	Data Science and application	IIT Madras	2023 - Current

Projects

Web Scraping & Data Quality Improvement
Project Intern

- Developed Python scripts to scrape and consolidate operational data, reducing manual data collection effort by 40%.
- Cleaned and transformed scraped data using Excel and Python.
- Built dashboards and summary reports to help stakeholders understand patterns.

Lululemon Warehouse Implementation (TIL, Canada & LAX, USA)
WMS Consultant

- Developed and configured transactions for newly introduced inventory types using Manhattan Active WM.
- Configured new order planning strategy and related configurations, including allocation, cubing, picking, and replenishment.
- Spearheaded the setup of enhanced replenishment and drop-zone configurations for large-volume items warehouse expansion areas, improving pick time and labour charge by 30%
- Optimized storage utilization by assigning new locations for specific item sets.
- Supported TIL DC for ecommerce orders and LAX DC for both retail and ecommerce.
- Orchestrated Go-live configuration push using the config directory and provided Hypercare support, including RCA and issue resolution.
- Provided 24/7 production support for WMS applications, ensuring seamless operation.

Lululemon BRM AutoStore Implementation
WMS Consultant

- Tested AutoStore MHE outbound/inbound flows within Manhattan Active WM and SDI E manager.
- Enhanced picking efficiency by consolidating AutoStore and manual pick inventory.
- Optimized the inbound process for AutoStore-eligible items, improving storage accuracy by 40% and reducing mispicks by 60%.
- Tested and validated floor ECOMM Putwall equipment, ensuring system readiness for launch.
- Applied expertise in Root Cause Analysis to provide permanent fixes to problems.

Skills

Root Cause Analysis (RCA), Manhattan Active WMS, AutoStore Integration, Web Scraping, MHE Configuration, SQL Rest API Testing, Python, JIRA.
